4. (Amended) An amorphous metal alloy strip according to claim 1, having a composition defined by the formula:

 $M_k Y_p$

wherein:

M is a metal selected from one or more of the group consisting of Fe, Ni, Co, V and Cr;

Y represents one or more elements from the group consisting of P, B and C;

- k represents atomic percent, and has a value of from about 70 85;
- p represents atomic percent, and has a value of about 15 30;
- 5. (Amended) An amorphous metal alloy strip according to claim 4, having a composition defined by the formula:

 $M_aY_bZ_c$

wherein:

M is a metal selected from one or more of the group consisting of Fe, Ni, Co, V and Cr;

Y represents one or more elements from the group consisting of P, B and C;

- Z is one or more elements selected from the group Al, Si, Sn, Ge, In, Sb or Be;
- a represents atomic percent and has a value of from about 60 90;
- b represents atomic percent and has a value of from about 10 30;
- c represents atomic percent and has a value of from about 0.1 15;
- and, a+b+c = 100.

grade so, that therein, Dea

- 6. (Amended) An abrasive article which comprises the amorphous metal alloy strip having an articulated topographical definition according to claim 1.
- 7. (Amended) An abrasive article which comprises amorphous metal alloy strip having a numerical metal alloy strip having a plurality of an articulated topographical definitions according to claim 2.
 - 8. (Amended) A cutting article which comprises the amorphous metal alloy strip having an articulated topographical definition according to claim 1.
